Description	Unresolved Dualities

Unresolved dualities

Religare Arts I Gallery will host an exhibition titled 'The Human Animal' from 19 March to 8 April. The artists in this exposition address issues and feelings through a diversity of approaches from metaphoric to lyrical. Connectedness between the human and the animal worlds belongs to those phenomena that ever remain vital to experience and imagination. This may be especially evident in India given the open, unbridled behaviour of life that is accessible immediately in the raw along with its warmth as well as drastic manifestations. We still tend to discover in animals our own characteristics, emotions and condition - from spontaneous exuberance to violence, tenderness to victim-hood.
